MESSAGE FROM THE GOVERNOR

The following message was received from His Excellency, the Governor by the Secretary of State.

THURSDAY, JANUARY 19, 1933

35

STATE OF NEW HAMPSHIRE

CONCORD

Executive Chamber

JOHN G. WINANT
Governor

January 19, 1933.

To the Honorable Senate and
The House of Representatives,
Concord, New Hampshire.

Gentlemen:

On February third in Washington, D. C., an interstate conference of official delegates will be held to consider the important problem of taxation as it involves the forty-eight states and the federal government. This is the first official conference of this character ever to be convened in the United States. The taxation problem to be considered bears specifically upon the growing tendency of the federal government and the states to tap the same sources of taxation without regard to the real interest of the taxpayer or his ability to bear the tax burdens thus imposed. In other words, this conference should lead to a definitizing of the fields of taxation as between the taxing agencies.

The problem is being studied by a Congressional Subcommittee on Double Taxation from the standpoint of the federal government. The interstate conference or its committee will study the problem from the standpoint of the states.

The Senate and the House of Representatives of each State are invited to send official delegates to the interstate conference, and I am suggesting that the President of the Senate and the Speaker of the House of Representatives be the delegates of the New Hampshire Legislature.

May I urge you to take appropriate action to insure that New Hampshire be adequate represented at this important conference?

It is my hope that the State Tax Commission may be

represented at this conference by its Chairman and Secretary.

The call for this conference and date concerning it are attached herewith.

Sincerely,
JOHN G. WINANT,
Governor.

STATE OF MAINE

In the Year of our Lord One Thousand Nine Hundred and Thirty-three

JOINT MEMORIAL

*To the Honorable, the Senate and House of Representatives
of the United States of America, in
Congress Assembled:*

We, your Memorialists, the Senate and House of Representatives of the State of Maine, in 86th legislative session assembled, most respectfully present and petition your honorable body as follows:

WHEREAS, the immediate and greatest need of this Nation is to establish a fully employed citizenship, and normally functioning private industry offers the most desirable employment opportunities, and the primary and largest market for American produce and manufactures is found in meeting the wants of the American people, and the necessary employment in supplying these wants belongs first to American workmen; and

WHEREAS, without the free flow of gold, the common medium of international values, the exchange rates of many Nations' currencies have, by application of the law of supply and demand, become divorced from the actual values of those currencies as measured in buying power within the bounds of the Nation issuing the currency; and

WHEREAS, depreciated currency is seriously handicapping American industry, and our foreign markets are stifled, and our domestic industries face destruction by increased imports from depreciated currency Nations; and

WHEREAS, the economic life of the state of Maine is derived from basic industries, such as lumber, fish, pulp, wheat, fruits, coal, cement, and their allied industries, and the very existence of capital, industry, employment, wages and our standards of living are based on the profitable operation of these basic industries; and

WHEREAS, the Nation faces an emergency and the differences in money levels have existed for a long period and have not become adjusted; and

WHEREAS, Nations whose currencies are depreciated are able to ship merchandise into the United States, pay the existing tariffs, accept American currency in payment, and to make a greater profit on their merchandise than if sold in their own markets; and

WHEREAS, such importations from more than forty Nations of the world into the United States under the existing depreciated currency conditions has the effect of not only eliminating all tariff structures, but of enabling such merchandise to be sold at such a low price in the markets of the United States as to handicap and paralyze American industry and increase unemployment, and the industries of the United States are facing bankruptcy and destruction; and

WHEREAS, we believe, that unless this legislation is immediately passed, chaos and ruin threaten the financial and governmental structure of the United States; and

WHEREAS, Congressman Samuel B. Hill of the state of Washington has introduced in the present session of Congress a bill, the official title of which is:

A BILL "To prevent loss of revenue, to provide employment for American labor, and to maintain the industries and agriculture of the United States against the effects of depreciation in foreign currencies"; and

WHEREAS, the delay in enacting this bill into law at the present session of Congress is causing continued and alarming increase in unemployment in our industries, American industry and agriculture are being seriously harmed, and in many instances ruined, by this disastrous new form of competition, which is forcing hundreds of thousands of workmen to sacrifice their jobs; and

WHEREAS, the Government of the United States is being deprived of vast customs revenue under existing conditions; and

WHEREAS, equalization measures must be adopted to preserve American jobs for American workmen;

NOW, THEREFORE, BE IT RESOLVED, that the Senate and House of Representatives of the state of Maine respectfully urge the present Congress now in session, and the President of the United States, to promptly enact into law H. R. 13999; and

BE IT FURTHER RESOLVED, that this Memorial be immediately transmitted by the Secretary of State to the proper officers and committees of the United States Senate and House of Representatives, and a copy sent to each of the Representatives and Senators representing the state of Maine in the United States Congress; and

BE IT FURTHER RESOLVED, that this Memorial be immediately forwarded by the Secretary of State to the legislatures of all the states of the United States requesting that they pass and present similar Memorials to Congress;

And your Memorialists will ever pray.

REPORT OF THE NEW HAMPSHIRE SHORE AND BEACH PRESERVATION AND DEVELOPMENT COMMISSION

REPORT OF COMMISSION

To the Honorable John C. Winant, Governor of New Hampshire

The Honorable Council

The Honorable Senate

The House of Representatives

GREETINGS:

Pursuant to the authority conveyed in the laws creating the New Hampshire Shore and Beach Preservation and Development Commission, the members of the Commission have performed duties in accordance thereto and herewith submit the following report for the years 1931-32.

Believing that the solving of the erosion problem was paramount and primary to any commercial development, the work of the Commission has been confined to co-operation with the Federal Government in a study of the erosion conditions existing at Hampton Beach.

By the terms of the Congressional enactment creating the Federal Erosion Board, co-operation between the National and State agencies is carried on by the Engineer of the State Commission, William A. Grover, C.E., of Dover, N. H., and through him has come to this commission a complete summary of a year's work of the engineers of the War Department with maps, graphs, tables, plans and estimates, recommendations, etc. All of this data the Commission has placed

on file in the Highway Department where they are accessible to interested parties.

Various meetings of the members of the Commission have been held and the duties therein defined faithfully attended to.

Approval of the plan which the Federal Erosion Board recommended has been adopted and so recorded.

There are now pending in the Congress of the United States two measures; the first, a general one known as the Putphin bill which will enable the Government to grant financial aid in the construction of erosion remedies recommended by engineers of the War Department, the present laws permitting Federal financial aid only where navigation and commerce are of sufficient importance to warrant expenditure.

The second measure is the Rogers bill providing aid for the Hampton project.

From these measures the commission hopes eventually to receive the much needed Federal aid.

In the event of Federal aid denied or long deferred, the members of the Commission see but one feasible method of putting into effect the recommendations of the Federal Erosion Board. We believe that the harbor work, including jetties, etc., the river stabilization and bridge erection should be made a single project with a toll levy upon users of the bridge sufficiently large to pay the whole cost in a term of years.

The Commission, therefore, while concurring in the findings of the Erosion Board, believes that the entire undertaking should be attempted only upon its being made a self-liquidating project.

Time, however, is important. The section of the coast involved is rapidly disappearing and if the southern extremity of Hampton Beach is to be preserved, definite steps to begin remedial work must be taken by the Legislature at the 1933 session.

Reports of the commission's engineer and the Federal Ero-

sion Board are made a part of the report and are appended herewith.

Respectfully submitted,

To the New Hampshire Shore and Beach Preservation and
Development Commission:

GENTLEMEN:

In accordance with the provisions of the National Erosion Board, your engineer has the honor to transmit to the members of this Commission the report of the said National Erosion Board summarizing the work of the engineers of the War Department, who, under the direction of Colonel Park of the Boston District, made an exhaustive study of the erosion problem at Hampton Beach during the year 1932, and the board's recommendations thereto.

Through co-operation of your engineer with the War Department through the District Engineer in Boston, and later with the Erosion Board at Washington, it was definitely established that to be effective a very considerable amount of work must be done.

The success of the undertaking is dependent upon the stabilization of the outlet to Hampton River. By reference to the plans and charts accompanying the report of the Erosion Board (on file at the State Highway Department in Concord) it will be seen that very substantial structures are thought to be required. Also a hydraulic fill is thought necessary to the north (or Hampton River side) of the north jetty. The total cost of these features is estimated at \$610,000. This does not include any costs for the contemplated bridge, the fill for the approaches to same nor the revetments. Your engineer is of the opinion that the costs are higher than present prices would indicate but are in accord

with the usual costs. Adding to the estimates of the Erosion Board the cost of a new bridge and approaches would bring the entire undertaking to about one million dollars.

Respectfully submitted,

W. A. GROVER, C.E.

REPORT OF FEDERAL EROSION BOARD

WAR DEPARTMENT

Office of the Chief of Engineers

Washington

September 12, 1932

Mr. Wm. A. Grover

State Highway Department

State House

Concord, N. H.

DEAR SIR:

There is enclosed herewith a copy of the report, together with accompanying papers on the studies and investigations of beach erosion at Hampton Beach, N. H., made by the Beach Erosion Board in co-operation with the State of New Hampshire.

For the Chief of Engineers:

Very respectfully,

(Sig. of) MALCOLM ELLIOTT,

Major, Corps of Engineers

WAR DEPARTMENT, BEACH EROSION BOARD

Washington, D. C.,

July 15, 1932.

Subject: Shore Protection at Hampton Beach, New Hampshire.

To: The Chief of Engineers, U. S. Army.

SYLLABUS

The Beach Erosion Board, appointed by Paragraph 4, Special Orders No. 72, Office of the Chief of Engineers, Sep-

tember 18, 1930, is of the opinion that a north and a south jetty are essential to prevent the further serious erosion of the southern end of Hampton Beach and for the fixation and improvement of the inlet channel. It recommends (a) for the protection of the southern end of Hampton Beach, and incidentally, for reclaiming land between the jetty and the beach, a north jetty and a sand fill at an estimated cost of \$346,000 and (b) for the fixation and improvement of the inlet channel, a south jetty at an estimated cost of \$264,000.

1. The Beach Erosion Board, appointed by Paragraph 4, S. O. No. 72, Office, Chief of Engineers, September 18, 1930, under authority contained in Section 2 of the River and Harbor Act of July 3, 1930, submits the following report on a study made in co-operation with the State of New Hampshire of the conditions in the vicinity of Hampton Beach, New Hampshire, with a view to determining the location and type of structures best adapted to protect the shoreline from erosion and to stabilize the inlet into Hampton Harbor. Formal application for the investigation was made on March 15, 1931, by the New Hampshire Highway Department, the official State agency, and the study was authorized by the Chief of Engineers by indorsement dated May 15, 1931 (E.D. 6608-36). The cost of the study was \$7,000.00, one-half of which was paid by the State.

2. The study was made by the district engineer at Boston under the direction of the Board, and his report dated April 1, 1932, with appendices and maps is forwarded herewith, also additional plans and estimates dated June 25, 1932. The locality has been visited at intervals by various members of the Board, and on May 12, 1932, the Board convened at Hampton Beach for final study and discussion. Except as to the north jetty, the Board agrees in general in the conclusions and recommendations contained in the report of the district engineer.

3. The study included the following features:

- (a) A historical study of the changes in the beach and shore location that have occurred and are occurring at the present time.

- (b) A survey of the area in the vicinity of the entrance to Hampton Harbor and a determination of the area of the harbor.
- (c) A series of borings to determine the depth and position of bed rock in this vicinity.
- (d) The determination of the discharge of Hampton Harbor.
- (e) A determination of tidal heights at the inlet and within the harbor.
- (f) Observations on the movements of sub-aqueous floats to determine the direction and velocity of the currents within the harbor and in the vicinity of its entrance.

4. *Location and General Description.* Hampton Beach lies in the southeast corner of New Hampshire about 2 miles north of the Massachusetts line (see Sheet 1). It is a typical barrier beach consisting of a low strip of sand, averaging about 400 yards in width, separating the salt marsh from the ocean. It extends about $1\frac{1}{2}$ miles in a southerly direction from a glacial drumlin known as Great Boar's Head to the inlet to Hampton Harbor. South of the inlet a similar beach extends to the mouth of the Merrimack River; the portion to the north of the New Hampshire-Massachusetts line being called Seabrook Beach and that south of the line, Salisbury Beach.

5. Hampton Harbor is a shallow estuary into which flows Hampton River (formed by the confluence of Taylor and Hampton Falls Rivers) and several small streams which drain a large area of salt marsh. The fresh water run-off from the area of about 50 square miles which drains into the harbor is, in times of normal flow, negligible compared to the flow of salt water into and out of it. At mean high water the marsh islands in the harbor are partly covered, while at high water of spring tides a fairly wide strip of the marsh bordering the harbor is flooded.

6. The Hampton River Toll Bridge, built in 1902, crosses the inlet to the harbor about 600 yards from its mouth. It is of wooden trestle construction, 4600 feet long, and has a

draw which was put in working condition in September, 1931, after having been out of order for at least ten years. Motor boats are the only craft which habitually use the harbor and in the season of 1931 all except one of these could get under the bridge at all stages of the tide with the draw closed. The floor of the bridge is 20 feet above mean low water while the drawspan has a horizontal clear channel span of 29 feet, and a vertical clearance of 14 feet at mean low water.

7. The population of Hampton Beach in winter is small, averaging about 50 families, but the summer population is estimated at about 20,000. Its proximity to several thickly populated cities and its natural attractions make it a very popular summer resort. As in the case of many other beaches along the Atlantic coast, the use of the automobile has increased the ease with which people from nearby cities can reach it, and it has developed rapidly during the past 20 years. In 1931 the assessed valuation was \$3,300,135. The development of the south end of the beach followed closely the accretion that was then taking place in that section—an accretion which was, unfortunately, shortly followed by erosion which has continued to the present time.

8. Available maps of sufficient accuracy to indicate definitely changes in the beach and shore line are limited to those made at infrequent intervals since 1855 by the U. S. Coast & Geodetic Survey, the U. S. Geological Survey and the New Hampshire State Highway Department. A British Admiralty chart map published in 1776, while not definitely oriented, is considered of sufficient accuracy to determine the general location of the entrance at that time. The information secured from these charts is shown on Sheets Nos. 3 and 4, district engineer's report, and on Plate I, prepared in the office of the Board. It is unfortunate that more determinations of the low water lines are not available and that the intervals between the surveys are such as not to permit the changes to be followed in detail. Apparently four major movements of the inlet have occurred—

- (1) As shown by the 1776 chart, it was then south of Beckman's and White Rocks.

- (2) In 1855 it was north thereof but south of Gun Rock, whence it branched, one channel going easterly north of White Rocks and the other northeasterly on both sides of Town Rocks. In 1870 the most northerly limit was apparently reached and the low water channel was then wholly west of Town Rocks.
- (3) In 1912 the inlet was again south of Beckman's and White Rocks and was apparently in the most southerly location of record. The time of break through is not definitely shown. In 1886, the high water line was south of these rocks, but the low water line is not shown on the chart.
- (4) After 1912 the channel broke through north of these rocks and gradually widened to the northward. By 1931 Seabrook Beach was again tied to these rocks.

Accompanying and forming part of these movements, the sand spit at the southerly end of Hampton Beach has shifted over a large area extending about 2500 feet in an east-west direction and about 1700 feet in a north-south direction, while the sand spit at the northerly end of Seabrook Beach has moved over an equally large area. Stated briefly, Hampton Beach and Seabrook Beach have alternately been anchored to Beckman's and White Rocks.

9. The real development of Hampton Beach as an important summer resort coincided with the extension of the beach southward in the period preceding 1912, by which time this new section had been built up as far south as Beckman's Rock, and streets, sidewalks, and a sewer system had been constructed. When, shortly thereafter, the northerly movement of the inlet began, these improvements were gradually destroyed. By March, 1931, 201 building lots comprising 51 acres had been washed away and approximately 100 houses had either been moved or destroyed. During the severe northeast storm of March 4, 1931, which was accompanied by a very high tide, 50 lots were washed away, 18 houses destroyed and 9 houses moved back in time to prevent their destruction.

10. The rapidity with which this erosion has been taking

place during recent years is indicated by the varying distances that the high water line has moved back during the years indicated:

1912 to 1915.....	1,800 feet
1915 to 1926.....	650 feet
1926 to 1928.....	180 feet
1928 to 1931.....	350 feet, over 200 feet of which oc- curred between 1930 and 1931, and mainly in the storm of March 4, 1931.

These measurements were made at points of maximum loss. The net result was that the southerly 2000 feet of the beach measured northerly from White Rocks was lost and the recession westerly from a point about 1000 feet south of Exeter Avenue was 1800 feet. It may be noted, however, that the erosion has not yet extended as far as it did in 1855 and 1886 when the shoreline was back of its present location.

11. Efforts made by the town authorities to stop this erosion were unsuccessful. A pile breakwater substantially parallel to the shore and two concrete breakwaters, the remains of which are shown on Sheet 2, were constructed at a cost of over \$100,000. Apparently the pile breakwater was not completed by the addition of rock as originally proposed, and the indications are that the concrete breakwaters were defective either in design or construction and failed by undermining of the foundations. It is also stated that, while the town officials were thus attempting to prevent erosion, this had been increased by removing sand from the beach front for various purposes, and that this practice continues in spite of police regulations to the contrary. It is clearly essential that this practice should be stopped.

12. *Recent Shore Line Changes.* A topographic and hydrographic survey of the vicinity of the entrance to Hampton Harbor was made in July, 1931, the results of which are shown on Sheets 1 and 2. The horizontal and vertical con-

trol was carried out very accurately and a number of concrete monuments and heavy wooden stakes set. The horizontal control was tied into the U. S. Coast and Geodetic Survey triangulation system and the vertical control was based on three bench marks established by that department. In connection with that survey, the profiles AA to NN as shown on Sheet 1 were taken. All of these profiles, except LL, MM, and NN, were first taken in July and observations were repeated thereafter from August 1st to November 30th at intervals of 20 days. Until October 1st, those on the ocean front were carried to a depth of at least 15 feet below mean low water, and after that time to mean low water only. These key profiles were supplemented at the south end of Hampton Beach by 10 profiles spaced 100 feet apart between and parallel to profiles GG and HH. These 10 profiles were remeasured at intervals of 20 days from July 8th to October 1st. In order to correlate the changes indicated by these profiles, the topographic and hydrographic survey made in July was repeated in September. In addition aerial photographs were taken from which uncontrolled mosaics were made.

13. While profiles AA, BB, CC, and DD, north of Haverhill Avenue showed considerable rearrangement of sand in each profile, the net results showed no appreciable loss or gain (Sheet No. 2). In profiles EE and FF there was some accretion between the low water and high water lines and mainly on the north side, probably due to the short low rock piles at Exeter, Dover and Concord Avenues. Practically no change was noted at GG. Profiles HH and II and the supplemental profiles between GG and HH showed a steady erosion at the crest of the beach and the high water line. At Exeter Avenue the high water line was pushed back 90 feet between July 8th and November 4th and four cottages had to be moved. It was also noted that although the large shoal area extending from the south end of Hampton Beach to and beyond Town Rocks is nearly level and changed but little during the period of observation, rather rapid changes occurred in the sand ridge bordering the low water line on

the northerly side of the channel and west of Town Rocks, and that the net result was the building up of this ridge and its extension in length toward Town Rocks. On the south side of the inlet at profile JJ the high water line moved out about 60 feet but erosion occurred on either side so that there was no substantial change along the section of the shore from Beckman's Rock to the bridge. At profiles KK, LL, and MM, south of White Rocks no substantial changes occurred. At profile NN across the inlet at the bridge a small increase in cross sectional area occurred, caused by erosion on both sides depths. A study of substantial change along the section of the shore from Beckman's Rock to the bridge. At profiles KK, LL, and MM, south of White Rocks no substantial changes occurred. At profile NN across the inlet at the bridge a small increase in cross section area occurred, caused by erosion on both sides but with no increase in depths. A study of the contours and typical profiles in Hampton Harbor from the July and November hydrographic surveys shows considerable shifting of sand, with apparently a slight excess of accretion.

14. These observations were made during the part of the year in which comparatively calm weather prevails, and while there were a number of storms none were really severe. The indications therefrom are that at present in ordinary weather—

- (a) The front of Hampton Beach as far south as Haverhill Avenue changes little;
- (b) From Haverhill Avenue to the inlet, namely Exeter Avenue, there is no erosion and even a slight accretion due to the effect of the three rock piles;
- (c) The greatest erosion takes place at the south end of the beach, particularly at Exeter and River Avenues;
- (d) The south shore between Beckman's Rock and the bridge changes little, the changes observed being in the shape of the shoreline rather than in excess of erosion over accretion or the reverse;
- (e) The front of Seabrook Beach south of White Rocks changes little;

- (f) The sands of Hampton Harbor are constantly shifting, the net result being a slight accretion.

The indications as to the present tendencies appear to be substantiated by a comparison of the 1928 and 1931 low water and high water lines, except that in the severe northeast storm of March 4, 1931, erosion extended above Haverhill Avenue. It is also noted that during this three-year period the low water line east of Town Rocks has moved shoreward about 800 feet.

15. *Tidal Ranges.* Tidal ranges as determined during the survey by an automatic tide gauge located at the bridge, and from observations of the U. S. C. and G. S. in 1928, are as follows: referred to the plans of mean low water—

Highest high water June 22–November 28, 1931 9.8 feet

Mean high water..... 8.3 feet

Lowest low water..... 1.0 feet

Maximum still water level in storm tides in

Hampton Harbor as determined by locally

authenticated marks.....12.0 feet

16. *Borings.* Borings to determine the depth and position of bed rock were made and the results are shown on Sheet No. 2. All borings were to a depth of at least 50 feet below mean low water when no rock was struck, except some of those near Town Rocks, where difficult driving was encountered.

17. *Float observations.* Observations of the paths of 56 subaqueous floats off Hampton Beach from Great Boar's Head to the inlet and into the harbor, and off Seabrook Beach to the New Hampshire-Massachusetts line, were made under as many varied conditions of tide, wind and sea as possible from August to November, inclusive.

18. Study of these observations indicates that near the inlet tidal current predominated over wind or littoral currents, but that this predominance decreased rapidly as the distance from the inlet increased. North of the inlet these tidal currents became practically negligible to the north of Haverhill Avenue and on the south side to the south of Thompsons Rock. Conditions varied, of course, with the range of the tide and the strength and direction of the wind.

No eddy current was observed for Hampton Beach, but such a current was indicated by several floats at the north end of Seabrook Beach.

19. The average velocity during the time observed and the maximum velocity attained in one-half hour were computed for each float path. Those floats, which were observed off the stretches of shore not immediately adjacent to the inlet and which were not, therefore, subjected to the influence of the stronger tidal currents near the inlet, had average velocities varying from 0.03 to 0.45 feet per second, and maximum velocities varying from 0.08 to 0.67 feet per second. In the same sections off the shore the greatest observed velocity that was unquestionably due to tidal current alone was 0.20 feet per second, and occurred when the range of tidal current alone was 0.20 feet per second, and occurred when the range of tide was 9.8 feet (see Sheet 5 path 5). The velocities of floats which were considered to have been motivated primarily by wind currents were compared with the estimated velocities of the wind at the time of observation. These float velocities varied from 0.6% to 1.4% of the corresponding wind velocities, varying with different length of floats but averaging about 1 per cent. Away from the inlet and seaward of the line of breakers the wind currents predominated. Although this locality is almost equally exposed to the northeast and southeast winds, a study of data obtained from the Weather Bureau (Appendix I) indicates a general though not very great preponderance of the northeast winds over the southeast winds, causing prevailing currents from north to south.

20. *Discussion.* This preponderance of currents caused by northerly winds and their velocities are too small to explain the shifting of the inlet on the theory that, in the general case, such movement is the result of littoral drifting along shore caused by such currents. Furthermore, the cycle of changes, so far as known, does not coincide with that theory. The causes in this case are not readily determined. Apparently the set of the tidal current is the most important factor. The characteristics of these currents at

the inlet are controlled by the shape of the shore lines bordering it and the location and direction of the inlet channel. The currents and storm waves determine the changes in shoreline and inlet channel, and those changes in turn cause changes in the currents. This process is continuous during all conditions of waves and winds, the effect of these agencies being to aid or modify the tidal currents. Even during severe storms with accompanying high tides, it is not to be expected that anything but a speeding up and extension of the general trend of changes will occur unless the sea can break through a low narrow strip of sand. If that happens a new inlet is very likely to be formed rapidly creating new tidal currents which may start a new cycle of changes. At the present time the sand at the north end of Seabrook Beach has too high an elevation to render a break through very likely during the most severe storms.

21. It seems reasonable to conclude that conditions are very probably now similar to those obtaining prior to 1855, and that unless protective measures are taken, it is likely that the inlet will continue its northerly movement until finally a large part of that section of Hampton Beach south of Haverhill Avenue and east of Ocean Boulevard will have been eroded, with the shoreline in a location similar to that of 1855 and with the inlet channel west and north of Town Rocks as in 1870.

22. *Plans Proposed.* To prevent the further erosion of the southern end of Hampton Beach, a north jetty is necessary, and for the fixation and improvement of the inlet channel by controlling the tidal currents, a north and a south jetty are considered essential. A number of plans were given consideration. For the south jetty a location running from the present bridge eastward to Gun Rock and thence to White Rocks is considered best. For the north jetty the locations given most serious consideration were—

- (a) One running from the point of the beach between Dover and Exeter Avenues southeasterly to Town Rocks.
- (b) One running easterly from the present bridge to Town

Rocks, with a sand fill between it and the 12-foot contour.

23. On account of its obliquity plan (a) probably would be relatively ineffective as a sand trap, and possibly also as a protection to the beach to the northward, due to the possibility of scour at its inner end from the concentration of wave action. Neither would it positively control the direction of the currents through the inlet. Plan (b) with the fill proposed, may be expected to fully protect the present beach, properly direct the inlet currents and reclaim a considerable area at the southern end of Hampton Beach between Exeter Avenue and the jetty. This plan is therefore considered preferable.

24. Details of the proposed jetties are shown on Plate II. The inner end of the north jetty consists of a steel pile structure properly braced and protected by riprap. The outer end, which will be subject to severe wave attack, consists of a rubble mound jetty with a steel sheet pile core. For the southern jetty, a rubble mould type without a core is proposed.

25. The jetties should be approximately 1,100 feet apart and extend to the existing bridge. The bridge trestle to the north and south of the channel between the jetties should be filled and protected on the harbor side by riprap or otherwise. The estimates submitted do not include this cost.

26. The estimates are as follows:

a. North jetty.

(1) Section BB'—1200 ft. type WW @ \$ 74	\$88,800
(2) Section B'B"—450 ft. type XX @ 175	78,750
(3) Hydraulic sand fill, 525,000 cu. yds @ .25	133,750

\$301,300

Contingencies, about 15% 44,700

\$346,000

b. South jetty.	
38,280 tons rubble stone @ \$6.00	\$229,680
Contingencies, about 15%	34,320
	<hr/>
	\$264,000
	<hr/>
	\$610,000

27. *Recommendations.* The Board therefore recommends:

a. For the protection of the southern end of Hampton Beach, and incidentally for reclaiming land between the jetty and the beach, a North jetty BB'B'' with sand fill as shown on Plate II, at a total estimated cost of \$346,000.

b. For the fixation and improvement of the inlet channel, in addition to the north jetty, a south jetty CC'C'', as shown on Plate II, at an estimated cost of \$264,000.

LEAVE OF ABSENCE

The Honorable Secretary of State appeared and delivered the following message.

STATE OF ARIZONA

STATE OF ARIZONA,
ELEVENTH LEGISLATURE,
REGULAR SESSION.

SENATE JOINT RESOLUTION 2.

Urging state legislatures to petition Congress to pass United States Senate Bill 1197, known as the Frazier bill, and to amend said bill to include ranchers and livestock owners.

Be it resolved by the Eleventh Legislature of the state of Arizona, that

A crisis exists and hundreds of thousands of once prosperous farmers, ranchers and livestock owners in this nation have already lost their homes and their all by mortgage foreclosures because of the fact that the price of agricultural products and livestock have for years been below the cost of production, a condition that affects all of the people of this nation, and is largely responsible for the continuance of the depression; and

There is no adequate way of refinancing existing agricultural indebtedness and the farmers, ranchers and livestock owners are at the mercy of their mortgagees and creditors; and

Unless immediate relief is given, thousands and hundreds of thousands of additional farmers, ranchers and livestock owners will lose their farms, ranches and livestock and their homes, and millions more will be forced into our cities and villages, and the army of unemployed will necessarily increase to alarming proportions, precipitating a condition that threatens the very life of this nation; and

The state legislatures of Montana, North Dakota, Minnesota, Wisconsin, Nevada and Illinois have each and all petitioned Congress to pass Senate Bill 1197, known as the Frazier bill, without delay; which bill provides that existing farm indebtedness shall be refinanced by the government of the United States at one and one-half per cent ($1\frac{1}{2}\%$) interest and one and one-half per cent ($1\frac{1}{2}\%$) principal on

the amortization plan, and through mortgages on livestock at three per cent (3%) per annum, not by issuing bonds and plunging the nation further into debt, but by issuing federal reserve notes the same as the government now does for the banks through the federal reserve bank: Now, therefore, be it

Resolved, That the legislature of the state of Arizona respectfully requests and petitions the legislatures of the other states that have not already done so to petition Congress to pass Senate Bill 1197 without delay, and amend same to include ranches, ranges and livestock, in order that the agricultural and ranch indebtedness of this nation may be speedily liquidated and refinanced, and agriculture and livestock saved from utter ruin and destruction, and this depression brought to an intelligent and speedy end; and respectfully requests that the state legislatures cause copies of such resolution, after same has been passed, to be sent to the President of the United States, to the President of the Senate and the Speaker of the House, to Senator Frazier at Washington, D. C., and to William Lemke, Congressman-elect, at Fargo, North Dakota; be it further

Resolved, That the secretary of state cause sufficient copies of this resolution to be printed and that he mail a copy to the President of the Senate and the Speaker of the House of each of the states that have not as yet petitioned Congress to pass Senate Bill 1197, requesting that said resolution be read before each of said bodies; and be it further

Resolved, That Arizona's representatives in Congress—Senator Henry F. Ashurst, Senator Carl Hayden and Honorable Lewis Douglas—be sent copies of said resolution.

Approved February 2, 1933.

Passed the Senate Jan. 31, 1933, by the following vote: 19 Ayes, 0 Nays, 0 Not voting.	Passed the House Feb. 2, 1933, by the following vote: 51 Ayes, 1 Nays, 0 Absent, 12 Excused.

MESSAGE FROM THE GOVERNOR

His Excellency, the Governor, appeared and delivered the following message to the Senate.

March 21, 1933.

Mr. President,
Honorable Senators:

RACE TRACK BILL

In order to be prepared to act on House Bill No. 289, relating to horse racing and legalizing pari mutuel betting, I asked the Attorney General to prepare a memorandum setting out his opinion of the provisions of the act as it affects present legislation and as to its compliance with the provisions of the Constitution. A copy of this memorandum I am transmitting to you. The fact that this measure which legalizes horse track betting has been limited to a two-year trial period and that a large majority of both Houses of the Legislature, representing three-quarters of the people of the State, approved the bill has prompted me to ask that the Senate recall this bill for corrections and changes rather than attempting to meet this situation by a direct veto.

The exemptions in the bill as stated in the language of the Attorney General are probably unwise. The phrase "other fair associations" is indefinite. These uncertainties permit a means of evasion that should be corrected.

The constitutional questions in regard to taxation and revenue raised by the Attorney General can be answered by a request for an opinion by the Supreme Court. It is my understanding that permissive legislation under this act was

granted by the members of the General Court in the belief that substantial revenue would accrue to the state. Any uncertainty in this regard should be definitely removed. As the act now stands under the "Separability Clause," Section 26, the grants under the act would hold regardless of the constitutionality of the revenue clauses. The present investment in race track facilities in the state could easily be recovered with profit within a period of two years.

If the repealing clause at the end of the bill is narrowly construed, the winner in a pari mutuel fund could not sue to recover his gains; while if a broader interpretation of this repealing section is made by the court it might repeal all gambling laws on the statute books.

It would seem to me that in delegating authority to appoint commissioners under the act, the right of removal should also be granted. The members of the commission should be specifically excluded from having any pecuniary interest in any racing or the sale of pari mutuel pools licensed under the provisions of the bill.

The Florida statutes limit the attendance of minors at any race track where pari mutuel pools are sold. I find no similar protective clause in this bill.

I would recommend that paragraph 6, entitled "Assistants," be amended to specifically include policing. Section 14 should be amended by adding "and the rules and regulations prescribed by the commission." The penalty clause under Section 15 should be made to include any violation of the act or rules and regulations prescribed by the commission. Under Section 20 the audit of accounts should be certified not only by a public accountant qualified to practice in this state, but one approved by the commission.

The commission should have express power to investigate as to the direct and indirect ownership and control of the licensees and all expenses incurred by the commission in so doing should be at the expense of the licensee or the applicant for a license (much in the same manner as a public utility corporation must pay the expenses of investigations by the Public Service Commission under New Hampshire Law).

I know that you want this bill to be a valid contract properly provisioned and implemented to protect the interests of the State. I hope my suggestions and the Attorney General's opinion may be helpful to you in carrying out this objective.

March 16, 1933.

From: Francis W. Johnston, *Attorney-General*

Subject: House Bill No. 289

To Hon. John G. Winant

Concord, New Hampshire

Dear Governor Winant:

I understand that you desire my opinion as to House Bill No. 289 relating to horse racing.

County, town or other fair associations are exempt from the requirements for a license although they may conduct pari-mutuel pools, from the tax on admissions and from the requirement for a bond which is for the payment of the tax on the pari-mutuel pools and other purposes. County and town fair associations are not conducted by counties and towns but are private business associations, the same as other fair associations.

It seems to me that the discrimination hereby made is at least distinctly unwise.

The phrase "other fair associations" is very indefinite. It provides a very easy means of evading the requirements of the act and in such a way that a court probably could not ascertain it to be an evasion and so penalized.

Even from the point of view of the exercise of the police power there is a very grave question that this discrimination makes the bill unconstitutional.

"But even the police power, comprehensive as it admittedly is, has its limitations; and in this state, at least, it is subordinate to the equality of privilege and of burden secured by the bill of rights and guaranteed by the constitution in clearly expressed provisions which mean just what they declare." *State v. Jackman*, 69 N. H. 318, 331, 332. "The right of acquiring property and the rights of life and liberty,

which the second article of the bill puts together in a class of rights there described as natural, essential and inherent, are secured for all men." *Opinion of the Justices*, 66 N. H. 629, 631; *Aldrich v. Wright*, 53 N. H. 398, 399, 400."

State v. Ramseyer, 73 N. H. 31, at p. 34.

There are two provisions in the bill relating to taxation, so called, that for a tax of 3% on the pari-mutuel fund and a tax of 15% or 10¢ each whichever is greater on admissions. The question of whether a tax provision is constitutional is a difficult one.

It probably is fair to assume that these tax clauses are for the purpose of revenue. That has been the argument. The bill requires no fee in payment for the license.

The tax of 3% on the pari-mutuel fund is probably valid. While it does not call for the average of taxation of the estates tax, I believe it would be justified under the 1903 amendment to the constitution which made possible taxation of "other classes of property, including franchises and property when passing by will or inheritance."

As a revenue measure it seems to me that the tax on admissions may be unconstitutional. First, it may violate the constitutional provision for proportional and reasonable assessments in that county, town and other fair associations are exempt from this tax and in that in towns or cities that do not accept the act race meets may be conducted and the admissions are not subject to this tax. Second, the specific tax of 10¢ would seem to violate the same constitutional requirement of proportion and reasonableness.

"Except in the case of the tax upon polls, taxes are required to be laid *ad valorem*."

Opinion of the Justices, 82 N. H. 560 at p. 563.

If a tax on admissions is justified as a license fee or a tax under the police power similar to the former tax on spirituous liquors, I would answer as stated above, that the argument and apparent purposes of the bill is that large revenue will be produced. Either as a license fee or a tax similar to the former tax on liquor it would be unconstitutional if the discrimination in favor of county, town or other fair associations

or that in favor of cities or towns that do not accept the act is arbitrary. A license fee must be limited approximately to the cost of supervision and regulation.

"Where, however, the amount exacted is greatly in excess of the probable amount necessary to issue licenses and inspect and regulate the business, it is generally regarded as a tax for revenue and not a license tax."

37 C. J. 171.

The separable clause in Section 26 would seem to do more harm than good so far as the state is concerned. It would follow that if either or both tax provisions were invalid that the remainder of the act would stand and the state would lose the corresponding revenue.

The effect of the repealing clause in Section 28 is not certain. I should expect that under the authority of *Bank v. Tilton*, 82 N. H. 81 and *Pollard v. Gregg*, 77 N. H. 190, the only effect would be that conducting a pari-mutuel fund is legal and not subject to a penalty and that Sections 17 to 20 inclusive of Chapter 384 of the Public Laws are not repealed. If this narrow construction is followed then the winner could not sue to recover his gains and the subscribers could recover the money paid. If a broader view of the repealing section is adopted by the court, we might have the very undesirable result that all gambling laws are repealed. It certainly is desirable that the repealing section be more specific.

Very truly yours,

FRANCIS W. JOHNSTON (Signed)

MESSAGE FROM THE GOVERNOR

The following communication was received from His Excellency, the Governor.

To the Honorable Senate:

Gentlemen:

I am informed that a Committee of the Honorable Senate has rewritten House Bill Number 289, entitled "Relating to Horse Racing and Creating a State Racing Commission." In redrafting this bill, fifteen amendments have been suggested.

One of these amendments has to do with taxation and revenue. In my judgment a fixed tax on gate receipts is necessary in order to protect the State's interest in gate receipts. The income from admissions as shown by the experience of other states is so much less than profit obtained from pari mutuel pools that race track operators, as a matter of business judgment, make such charges subject to change. Therefore, in order to protect the State's tax interest in admissions a fixed charge of ten cents was written in the bill. This practical insurance of definite revenue from admissions is an essential part of the bill. This provision of the bill, however, is of doubtful constitutionality; but is so necessary that I again ask that this question be submitted to the Supreme Court for an advisory opinion.

New Hampshire has already suffered from the enactment of unconstitutional tax measures. The Legislature of 1925 was compelled to provide for the repayment of almost one million dollars of inheritance taxes. This money had already been collected and expended. Up to the present moment, the State Treasury has been paying for this "dead horse." I believe that before this legislation is enacted into

law that we should make certain that its provisions are constitutional.

The Attorney General advises me "that the wise course to follow is to have the question of the constitutionality of the specific tax presented to the Supreme Court and answered by that body." I am enclosing his entire opinion for your information and guidance. It is not my wish to unnecessarily delay the passage of this measure, and I believe the request to insure its constitutionality is in the interest of all concerned and can be definitely settled within a short period of time.

Sincerely,

JOHN G. WINANT,
Governor.

In case a majority of the qualified voters of a city or town present and voting at such elections shall vote in the negative on said question, the clerk of the city or town shall immediately certify that fact to the commission and in such cities and towns no person shall sell or buy liquor except as provided in this act.

17. Any city or town which has or has not accepted the provisions of this act may at a regular or special town meeting or at a meeting of the city government, vote in favor of permits to druggists for the sale of liquor in the town or city for medicinal purposes and the mayor of the city or selectmen of the town may give such permit to a druggist applying for the same. 1. *Poor Relief.* During the emergency resulting from the existing depression but not longer than December 31, 1934, there is hereby constituted a Director for Poor Relief. The Governor and Council are hereby authorized to appoint said director and fix his compensation. All expenses incurred by said director under the provisions of this act shall be paid by the State treasurer from the emergency relief fund hereinafter provided for.

2. *Powers and Duties.* Said director shall have oversight of the administration of the poor relief provided for in this act, may make such rules and regulations as may be necessary for said administration, shall exercise a general supervision of the work in the various counties, and shall have such other powers and duties as may be necessary and reasonably required for the effective administration of this act.

3. *Poor Relief.* During the time when this act is in force

said director is hereby directed to assume and exercise whenever and so far as it may be expedient all the authority and powers now vested in other agencies of the counties, cities or towns in respect to aid for persons who are poor and unable to support themselves, other than such persons as are cared for in institutions of the State and of the counties, and to grant or administer aid either by direct relief or employment projects in such manner and under such conditions as may be necessary.

4. *Administration.* The administration of relief for such poor persons shall be in the hands of a trained welfare worker in each county. Said workers shall be appointed by said director and shall be subject to supervision by said director. Said director is hereby authorized to make rules and regulations for the administration of this act, to employ and fix the compensation of the workers in charge of aid in each county and such other assistants as may be necessary, and said workers are hereby directed to consult with, and employ so far as possible, county commissioners, selectmen, overseers of the poor and other agencies of government having to do with poor relief. Such officers and agencies are hereby directed to comply with such requests as the said workers may make upon them provided such requests fall within the scope of this act or of existing statutes. The assistants employed by the director, as above provided, other than the worker in charge in each county, shall be residents of New Hampshire.

5. *Authority to accept Funds.* The Governor and Council are hereby authorized on behalf of the State, to accept and to apply to the carrying out of the purposes of this act all moneys that may be advanced to, or otherwise placed at the disposal of, the State by the federal government, or any of its agencies for the relief of distress or that may be donated to the State for that purpose by individuals, associations of individuals, partnerships or corporations.

6. *Bonds Authorized.* In order to supply the additional funds needed for carrying out the purposes of this act, the State treasurer is hereby authorized, in the discretion of the

Governor and Council, to borrow in such amounts as may be determined by the Governor and Council upon the credit of the State six hundred thousand dollars (\$600,000) for the calendar year ending December 31, 1933 and one million two hundred thousand dollars (\$1,200,000) for the calendar year ending December 31, 1934, and for that purpose may issue bonds or notes in the name of, and on behalf of, the State at the lowest rate of interest obtainable, in such form, such denominations, at such dates of maturity and at such time as the Governor and Council may determine. Such bonds and notes shall be countersigned by the Governor and shall be deemed a pledge of the faith and credit of the State. The Secretary of State shall keep an account of all such bonds and notes countersigned by the Governor, showing the number and amount of each bond or note, the time of countersigning, the time when payable and date of delivery to the treasurer. The State treasurer shall keep an account of each bond and note, showing the number thereof, the name of the person to whom sold, the amount received for the same, the date of the sale and the time when payable. The treasurer may negotiate and sell such bonds or notes by direction of the Governor and Council in such manner as they may determine most advantageous to the State.

7. *Emergency Relief Fund.* The money received from the sale of the bonds or notes authorized by Section 6 hereof, and all moneys received by the State as provided in Section 5 hereof, shall be deposited with the State treasurer to the credit of a special fund to be known as the Emergency Relief Fund and paid out by him upon warrants drawn by the Governor for the purposes of this act alone; provided that any moneys remaining to the credit of such fund after the termination of the period during which this act is in force, and after all obligations against such fund have been liquidated shall be held by the State treasurer and applied to the payment of the bonds or notes issued hereunder.

8. *Payments to Counties.* The county commissioners shall make application to the Governor and Council for an allotment for their respective counties from the Emergency Relief Fund herein provided for and payments shall be al-

lotted to the various counties in such amounts as the Governor and Council shall determine, provided that no one county shall in any event receive less than ninety thousand dollars from the proceeds of the sale of the bond issue provided for herein, if sums totaling such amount are requested by the county commissioners for said county, and provided further that the balance of the Emergency Relief Fund, other than the proceeds of the bond issue, shall be allotted so that no one county shall receive less than five per cent thereof, if such sums are requested.

9. *Accounts; Allocation Between Towns.* Each county shall keep a separate account of all moneys received from said emergency fund and of all payments made therefrom, in such form and in the manner determined by the tax commission which commission shall, from time to time as it may determine, audit said accounts. The worker in charge of each county, under the direction of the director, shall have the authority to allocate payments for such relief between the county and the towns and cities therein.

10. *Reimbursements of Fund by Counties, Cities and Towns.* All expenditures in carrying out the purposes of this act shall be made in the first instance from said emergency fund but the several counties, cities and towns shall, from time to time, reimburse said fund for all expenditures allocated to said counties, cities and towns to the extent of twenty-five per cent thereof. For the purpose of fixing tax rates and tax assessments of the several counties, cities and towns the director and the county commissioners are authorized to estimate the amount to be charged to each county, city and town and to instruct the tax commission in regard thereto. The county conventions shall take into account in making their appropriations the amounts expended and debts incurred prior to the passage of this act for the purpose of poor relief, together with such reimbursements to the State as the county is required to make under the provisions of this act.

The selectmen of towns and mayors of cities are hereby authorized and shall, upon instructions from the tax commission, direct the fixing of tax rates and the assessment of taxes, so that only such amounts shall be raised for the relief of the

poor of the town or city as will equal the amounts expended and the debts incurred for poor relief prior to the passage of this act, together with reimbursements to the State as the city or town is required to make under the provisions of this act. In the administering and for the purposes of this act alone the director shall have the power to determine what persons are poor and unable to support themselves, and to provide a procedure for the determination of all questions arising relative thereto, and to make agreements with other States in respect to the aid of, or the reimbursement for aid granted to, persons not residents for a length of time as determined in such agreements, of the State in which they happen to be at the time the aid is sought by or given to them.

11. *Termination of State of Emergency.* The director may at any time declare the termination of the emergency, within any or all of the counties, for the meeting of which this act is passed but failing such declaration said emergency shall be deemed to be terminated on December 31, 1934, and upon such termination the director shall cease to have the powers and duties by this act conferred upon him and the affairs of the organization set up for the administration of this act shall be wound up and liquidated.

12. *Report.* On the termination of the emergency the director shall cause to be prepared and submitted to the General Court a report setting forth an account of all payments made to each county from said emergency fund and of all operations had in carrying out the provisions of this act.

13. *Suspension of Laws.* All acts and parts of acts inconsistent herewith are hereby suspended while this act is in effect.

RALPH H. GEORGE,
ARTHUR P. GALE,
HAVEN DOE,

For a majority of the Committee.

A minority of the Committee on the Judiciary, to whom was referred House Bill No. 458, An act to enlarge the authority, powers and jurisdiction of the Public Service Commission, having considered the same, reported the same with the following amendment and recommended its passage.

Amend said bill by striking out all after the enacting clause and inserting in place thereof the following:

1. *Affiliates.* Amend Title XXV of the Public Laws by inserting after Chapter 258 thereof the following new chapter:

CHAPTER 258-A

Public Utilities and Affiliates

1. *Definition of Terms.* Terms used in this chapter shall be construed as follows unless a different meaning is clearly apparent from the language or context:

I. "Person" shall mean and include individuals, corporations, trustees, lessees, holders of beneficial equitable title, voluntary associations, receivers and partnerships.

II. "Affiliate" shall mean and include the following.

(a) Every person owning or holding directly or indirectly twenty per cent or more of the voting capital stock of a public utility.

(b) Any corporation, voluntary association or trust twenty per cent or more of the voting capital stock of which is owned or controlled directly or indirectly by a person owning or controlling directly or indirectly twenty per cent or more of the voting capital stock of a public utility.

(c) Any person with whom a public utility has a management or service contract or arrangement of the character set forth in Section 2, but not including contracts for personal services with persons not otherwise affiliated.

Contracts Between Public Utilities and Affiliates

2. *Filing of Contracts.* The original or a verified copy of any contract or arrangement and of any modification thereof or a verified summary of any unwritten contract or arrangement, the consideration of which exceeds \$500, hereafter entered into between a public utility and an affiliate providing for the furnishing of managerial, supervisory, construction, engineering, accounting, purchasing, financial or any other services either to or by a public utility or an affiliate shall be filed by the public utility with the commission within ten (10) days after the date on which the contract is executed or the arrangement entered into. The commission may also require a public utility to file in such form as the commission may require full information with respect to any purchase from or sale to an affiliate, whether or not made in pursuance of a continuing contract or arrangement.

3. *Failure to File.* Any contract or arrangement not filed with the commission pursuant to Section 2 shall be unenforceable in any court in this State and payments there-

under may be disallowed by the commission unless the later filing thereof is approved in writing by the commission.

4. *Investigation and Proof.* The commission shall have full power and authority to investigate any such contract, arrangement, purchase or sale and if the commission after notice and hearing shall find any such contract, arrangement, purchase or sale to be unjust or unreasonable, the commission may make such reasonable order relating thereto as the public good requires. In any such investigation the burden shall be on the public utility and/or affiliate to prove the reasonableness of any such contract, arrangement, purchase or sale with, from or to an affiliate. If the public utility shall fail to satisfy the commission of the reasonableness of any such contract, arrangement, purchase or sale the commission may disapprove the same and/or disallow payments thereunder or such part of any such payment as the commission shall find to be unjust or unreasonable. No payment disallowed by the commission shall be capitalized or included as an operating cost of the public utility in the fixing of rates or as an asset in fixing a rate base. If in any such investigation the public utility or affiliate shall unreasonably refuse to comply with any request of the commission for information with respect to relevant accounts and records, whether of such public utility or any affiliate, any portion of which may be applicable to any transaction under investigation, so that such parts thereof as the commission may deem material may be made part of the record, such refusal shall justify the commission in disapproving the transaction under investigation and/or disallowing payments in pursuance thereof.

5. *Summary Order in Certain Cases.* If as a result of an investigation in accordance with the preceding section the commission shall find that any public utility is making any payment or about to make any payment or doing or about to do any other thing which substantially threatens or impairs the ability of the public utility to render adequate service at reasonable rates or otherwise to discharge its duty to the public, the commission may apply to the

Superior Court for an order directing the public utility to cease making any such payment or doing such other thing and thereupon the court shall make such order as the public good may require.

6. *Disallowance of Charges under Existing Contracts.* In any proceeding whether upon the commission's own motion or upon complaint involving the rates or practices of any public utility, the commission may disallow the inclusion in the accounts of a public utility of any payments or compensation to an affiliate for any services rendered, or property furnished, under existing contracts or arrangements with an affiliate unless such public utility shall establish the reasonableness of such payment or compensation.

Reports Disclosing Interests in Public Utilities and Affiliates

7. *Annual Reports.* Every public utility annually reporting to the commission under Chapter 240 of the Public Laws shall also annually report the name and address of, and the number of shares held by its officers and directors and each holder of one per cent or more of the voting capital stock of the reporting public utility, according to its records.

8. *Information Concerning Control.* The commission may also require such other information as to the direct or indirect control of a public utility or affiliate from a public utility, affiliate, or other person as may be reasonably required for the effective enforcement of this chapter.

Procedure

9. *Rules.* The commission shall have power to make such reasonable rules as will aid it in the administration and enforcement of this act.

10. *Appeal.* From any order or decision of the commission in the exercise of the jurisdiction and power conferred upon it by this chapter, an appeal shall lie to the Supreme Court. Such appeal shall be governed by the provisions of law now in force respecting appeals from orders of the commission and which are not in conflict with the provisions of this act.

Miscellaneous Provisions

11. *Sale of Securities to or by Employees.* No public utility shall without the approval of the commission permit any employee to sell, offer for sale, or solicit the purchase of any security issued by an affiliate, during such hours as such employee is engaged to perform any duty of such public utility; nor shall any public utility by any means or device whatsoever require any employee to purchase or contract to purchase any of its securities or those of any other person or corporation; nor shall any public utility require any employee to permit the deduction from his wages or salary of any sum as a payment or to be applied as a payment on any purchase or contract to purchase any security of such public utility or of any other person.

12. *Separability.* If any clause, sentence, paragraph or part hereof shall, for any reason, be adjudged by any court of competent jurisdiction to be unconstitutional or invalid, such judgment shall not affect, impair or invalidate the remainder hereof.

13. *Takes Effect.* This act shall take effect upon its passage.

Mr. President:

The House of Representatives has receded from its position of non-concurrence on the amendments offered by the Honorable Senate and has voted to adopt the amendments offered by the Committee of Conference in the adoption of which amendments the House of Representatives asks the concurrence of the Honorable Senate.

House Bill No. 417, An act providing for emergency relief of distress in the State of New Hampshire.

Amend said bill by striking out all after the enacting clause and inserting in place thereof the following:

1. *Poor Relief.* During the emergency resulting from the existing depression but not longer than December 31, 1934, there is hereby constituted a Director of Poor Relief. The Governor is hereby authorized to appoint said director and fix his compensation and may remove him for cause. All expenses incurred by said director under the provisions of this act shall be paid by the State treasurer from the emergency relief fund hereinafter provided for.

2. *Powers and Duties.* Said director shall have general charge of the administration of the poor relief provided for in this act, may make such rules and regulations as may be necessary for said administration, shall exercise a general supervision of the work in the State, and shall have such other powers and duties as may be necessary and reasonably required for the effective administration of this act.

3. *Poor Relief.* During the time when this act is in force said director is hereby directed to assume and exercise whenever and so far as it may be expedient all the authority and powers now vested in other agencies of the counties, cities or towns in respect to aid for persons who are poor and unable to support themselves, other than such persons as are cared for in institutions of the State and of the counties, and to grant or administer aid either by direct relief or employment projects in such manner and under such conditions as may be necessary.

4. *Administration.* For the effective administration of this act the director is hereby authorized to divide the State into administrative districts, provided such districts do not cut across county boundaries, and the director shall appoint a trained welfare worker to have general charge of the administration of poor relief under this act in each district and such other assistants as may be necessary and fix their compensation. Such workers and assistants shall be subject to supervision by the director and shall serve during the pleasure of the director. Said workers are hereby directed to consult with and employ in the administration of this act

county commissioners, selectmen, overseers of the poor and other agencies of government having to do with poor relief so long as reasonably competent service is rendered by them and such officers and agencies are hereby directed to comply with such requests as said workers may make upon them within the scope of this act or existing statutes. The assistants employed by the director as herein provided other than the workers in charge in each district shall be residents of New Hampshire.

5. *Authority to Accept Funds.* The Governor and Council are hereby authorized on behalf of the State, to accept and to apply to the carrying out of the purposes of this act all moneys that may be advanced to, or otherwise placed at the disposal of, the State by the Federal government, or any of its agencies for the relief of distress or that may be donated to the State for that purpose by individuals, associations of individuals, partnerships or corporations.

6. *Bonds Authorized.* In order to supply the additional funds needed for carrying out the purposes of this act, the State treasurer is hereby authorized, in the discretion of the Governor and Council, to borrow in such amounts as may be determined by the Governor and Council upon the credit of the State six hundred thousand dollars (\$600,000) for the calendar year ending December 31, 1933 and one million, two hundred thousand dollars (\$1,200,000) for the calendar year ending December 31, 1934, and for that purpose may issue bonds or notes in the name of, and on behalf of the State at the lowest rate of interest obtainable, in such form, such denominations, at such dates of maturity and at such time as the Governor and Council may determine. Such bonds and notes shall be countersigned by the Governor and shall be deemed a pledge of the faith and credit of the State. The Secretary of State shall keep an account of all such bonds and notes countersigned by the Governor, showing the number and amount of each bond or note, the time of countersigning, the time when payable and date of delivery to the treasurer. The State treasurer shall keep an account of each bond and note, showing the number thereof, the

name of the person to whom sold, the amount received for the same, the date of the sale and the time when payable. The treasurer may negotiate and sell such bonds or notes by direction of the Governor and Council in such manner as they may determine most advantageous to the State.

7. *Emergency Relief Fund.* The money received from the sale of the bonds or notes authorized by Section 6 hereof, and all moneys received by the State as provided in Section 5 hereof, shall be deposited with the State treasurer to the credit of a special fund to be known as the Emergency Relief Fund and paid out by him upon warrants drawn by the Governor for the purposes of this act alone; provided that any moneys remaining to the credit of such fund after the termination of the period during which this act is in force, and after all obligations against such fund have been liquidated shall be held by the State treasurer and applied to the payment of the bonds or notes issued hereunder.

8. *Accounts; Allocation of Payments.* The director under the supervision of the Governor shall cause to be kept an accurate account of all moneys received to be credited to the said special fund and of all payments made therefrom. The accounts shall be of such a character as will distinguish the payments made in the form of direct relief of persons in the several counties, cities and towns and the Governor and Council shall have the power to make rules and regulations relative to the allocation of payments for such relief to the several counties, cities and towns; provided that not less than ninety thousand dollars from the proceeds of the sale of the bond issue provided for herein shall be allocated to any county including its cities and towns if sums totalling such amount are requested by the county commissioners; and provided further that not less than five per cent of the balance of the Emergency Relief Fund other than the proceeds of the bond issue shall be allocated to any county including its cities and towns if sums totalling such amount are requested by the county commissioners and need therefor is shown.

9. *Reimbursements of Fund by Counties, Cities and*

Towns. All expenditures in carrying out the purpose of this act shall be made in the first instance from said emergency fund but the several counties, cities and towns shall, from time to time, reimburse said fund for all expenditures allocated to said counties, cities and towns to the extent of twenty-five per cent thereof. For the purpose of fixing tax rates and tax assessments of the several counties, cities and towns the director and the county commissioners are authorized to estimate the amount to be charged to each county, city and town and to instruct the tax commission in regard thereto. The county conventions shall take into account in making their appropriations the amounts expended and debts incurred prior to the passage of this act for the purpose of poor relief, together with such reimbursements to the State as the county is required to make under the provisions of this act.

The selectmen of towns and mayors of cities are hereby authorized and shall, upon instructions from the tax commission, direct the fixing of tax rates and the assessment of taxes, so that only such amounts shall be raised for the relief of the poor of the town or city as will equal the amounts expended and the debts incurred for poor relief prior to the passage of this act, together with the reimbursements to the State as the city or town is required to make under the provisions of this act. In the administering and for the purposes of this act alone the director shall have the power to determine what persons are poor and unable to support themselves, and to provide a procedure for the determination of all questions arising relative thereto, and to make agreements with other States in respect to the aid of, or the reimbursement for aid granted to, persons not residents for a length of time as determined in such agreements, of the State in which they happen to be at the time the aid is sought by or given to them.

10. *Termination of State of Emergency.* The Governor, with the advice and consent of the Council, may at any time declare the termination of the emergency for the meeting of which this act is passed, but failing such declaration such emergency shall be deemed to be terminated on December

31, 1934; and upon such termination the director shall cease to have the powers and duties by this act conferred upon him and the affairs of the organization set up for the administration of this act shall be wound up and liquidated.

11. *Report.* On the termination of the emergency the director shall cause to be prepared and submitted to the General Court a report setting forth an account of all payments into and from said special fund and of all operations had in carrying out the provisions of this act.

12. *Suspension of Laws.* All acts and parts of acts inconsistent herewith are hereby suspended while this act is in effect.

13. *Takes Effect.* This act shall take effect upon its passage.
